17th International Exhibition Of TEXTILE INDUSTRY

The Largest Textile Exhibition at the Center of Iran

Iran's textile industry has a history that stretches back to the 11th and 12th centuries, when the country was one of the world's premier exporters of textiles and silks to Europe, Asia and the rest of the world.

Over a hundred years ago the first textile mill operating with European machinery was established in the Iranian capital Tehran, and today, Iran's textile and clothing industry accounts for more than 13 per cent of its industrial employment and makes up for more than 20 per cent of exports.

The country's textile companies are mostly based in the central provinces such as Yazd and Isfahan as well as the cities of Tehran and Qazvin, while there are also a lot of units in the Northern provinces and Azerbaijan.

Exports include garments, cotton and cotton-blend fabrics, and floor coverings. Iran features in the list of the world's top 20 textile investment opportunities, and industry experts are convinced there is still a wealth of untapped potential in Iran's textile and clothing industry just waiting to be discovered by overseas investors.

Advantages of Iran's Textile Industry:

- Good availability of raw materials
- Large number of manufacturing facilities
- Cheap labor force
- Cheap energy resources
- Low costs
- Unique location to easy access via Turkey to Europe, and direct access to Persian Gulf countries, CIS and Russia
- Being in the list of the world's top 20 textile investment opportunities
